of player who would likely win? 11 In his quest for the three keys, Wade is required to inhabit many imaginary worlds, including movies, video games, and a simulation of Halliday's childhood home Which of these virtual realities appealed to you the most? What sort of virtual reality is provided by a novel? 12 Is Wade a strong main character?

Problem Set #8 Solutions: Introduction to Game Theory

Start with player one: If player two chooses cooperate, player one should choose cheat (\$12 versus \$10) If player two chooses cheat, player one should also cheat (\$0 versus \$5) Therefore, the optimal strategy is to always cheat (for both players) this means that (cheat, cheat) is the only Nash equilibrium

Spring 2005 Stuart Russell Midterm Solution

Imagine that, in Q2, one of the friends wants to avoid the other The problem then becomes a two-player pursuit-evasion game We assume now that the players take turns moving The game ends only when the players are on the same node; the terminal payoff to the pursuer is minus the total time taken (The evader "wins" by never losing)
